Sonja Geirulv

Senior Project Engineer

Professional Summary

Experience in the oil and gas industry since 2008. As an Electrical Supervisor in Saipem, for Aker BP projects on the drilling rig Scarabeo 8, I was undertaking responsibilities akin to those of a Project Lead.

I have had the role of a discipline lead/ Discipline Task Responsible (DTR) engineer in projects for Shell, Equinor and OKEA, enabling me to lead people and manage projects with focus on safety and continuous improvement. As Discipline Task Responsible engineer I was accountable for design development and detail engineering, job card production and LCI deliverables. Working on M&M projects has given me the opportunity to be involved in all phases of a task, from concept development and design, planning and estimating, through preparing job packages to as-built.

Certified risk manager as from 11th of December 2018. My degree from the University in Macedonia (Former Yugoslav Republic) has been acknowledged by NOKUT as equivalent to a Norwegian Master's degree.

My test in Norwegian language is the so-called Bergenstest, prepared by the University of Bergen that I passed in 2001. I am a certified level 5 interpreter for Macedonian / Norwegian languages, registered at tolkeportalen.no. Autumn 2018 I took Basics of Quality management and Risk management courses arranged by KIWA Teknologisk Institutt.
